REVIEW AUDIT LOGS

SECURE API CALLS
BEST PRACTICES

OVERVIEW

- ISO 27001:2013 certified
 - HIPAA compliant
 - GDPR
-
- Most of the features I will talk about, are available to your account administrators to change.
 - Some features are not available on all plans, we recommend you upgrade your plans to be able to access all security features. Please contact support@leadsquared.com or your account manager for more details.

PREVENT UNAUTHORIZED ACCESS

IP Whitelisting

- This will help in preventing any un-intended visitors or attackers
- Check the feasibility if you can implement this
- Only requests from whitelisted IP's are accepted and everything else is blocked

Restriction using IP Whitelisting

You can restrict access to LeadSquared Account by setting up a whitelist of IP Addresses

Enable IP Restriction

Yes

No

You can restrict access to your Leadsquared Account by setting up a whitelist of IP addresses and enabling this setting. Any user who tries to log in or access your account from a computer with an IP address not included in the whitelist will not be able to access. If you do not want to enable IP Restriction for your account, you may disable this setting.

Enable IP Restriction for APIs

Yes

No

You can restrict access to your Leadsquared Account via APIs by setting up a whitelist of IP addresses and enabling this setting. If you do not want to enable IP Restriction for APIs, you may disable this setting.

Add IP Addresses

IP Address	Actions
------------	---------

Two Factor Authentication

- Username and Password as the first factor & OTP as second
- Email or Text message or TOTP (such as Google Authenticator, Microsoft etc.)

The screenshot shows the 'leadsquared' dashboard with a navigation bar containing 'DASHBOARD', 'CONTENT', 'MARKETING', 'LEADS', 'WORKFLOW', 'APPS', and 'REPORTS'. The 'Settings' page is open, with a sidebar menu on the left. The 'Security' option in the sidebar is highlighted in blue and has a red box around it. The 'Login Settings' option under the 'Security' category is also highlighted in orange and has a red box around it. The main content area shows 'Login Settings' with a subtitle 'Manage settings related to login.' There are two toggle switches: 'Enable Password Encryption' (which is turned on) and 'Mandate Two Factor Authentication' (which is also turned on and has a red box around it). The 'Mandate Two Factor Authentication' toggle has a description: 'Users have to setup two factor authentication to login'.

Authentication Provider

- You can validate usernames and passwords against your corporate user database or another client app rather than managing separate credentials for LeadSquared.
- Your organization password policies applies to LeadSquared too.
- Following are supported:
 - ADFS (Active Directory Federation Services)
 - Google
 - API

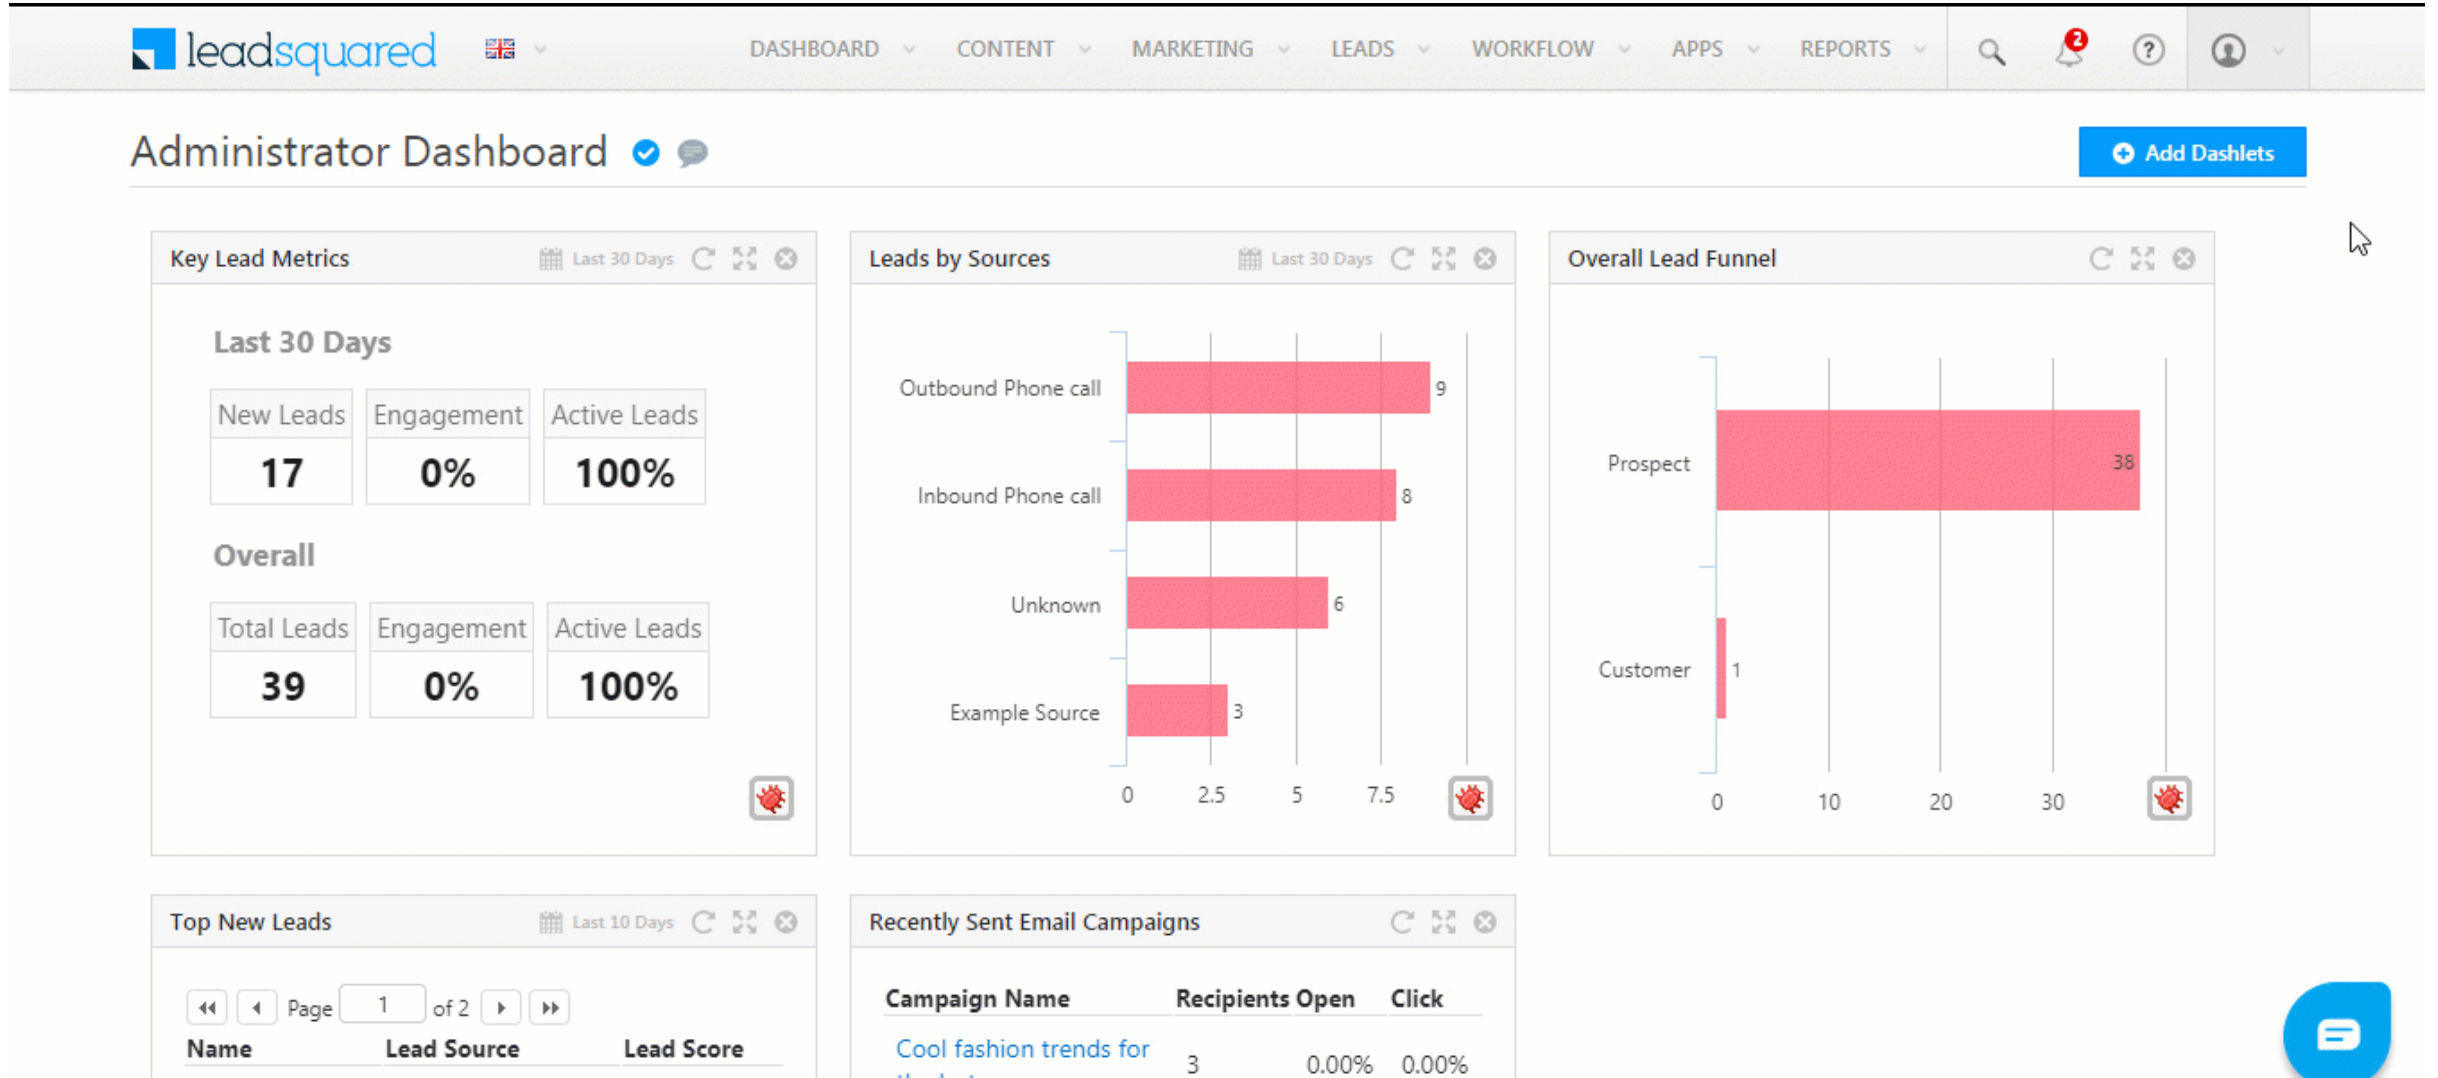

Authentication Provider

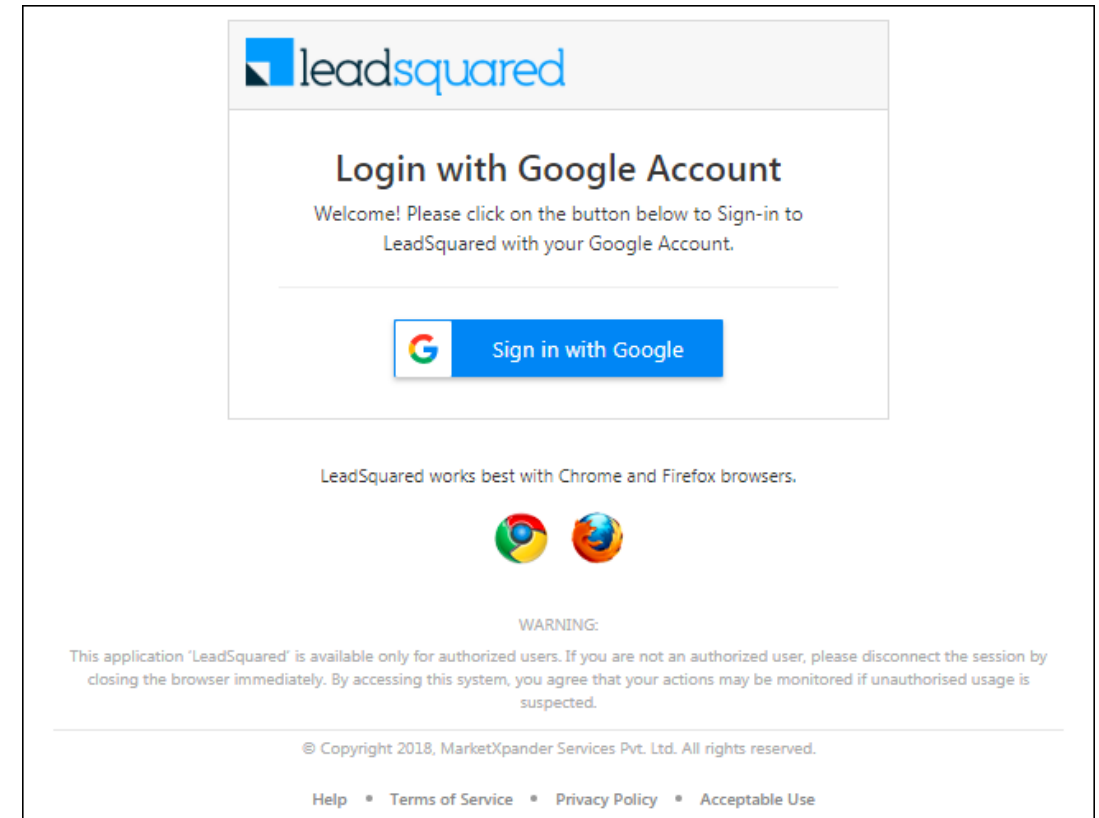

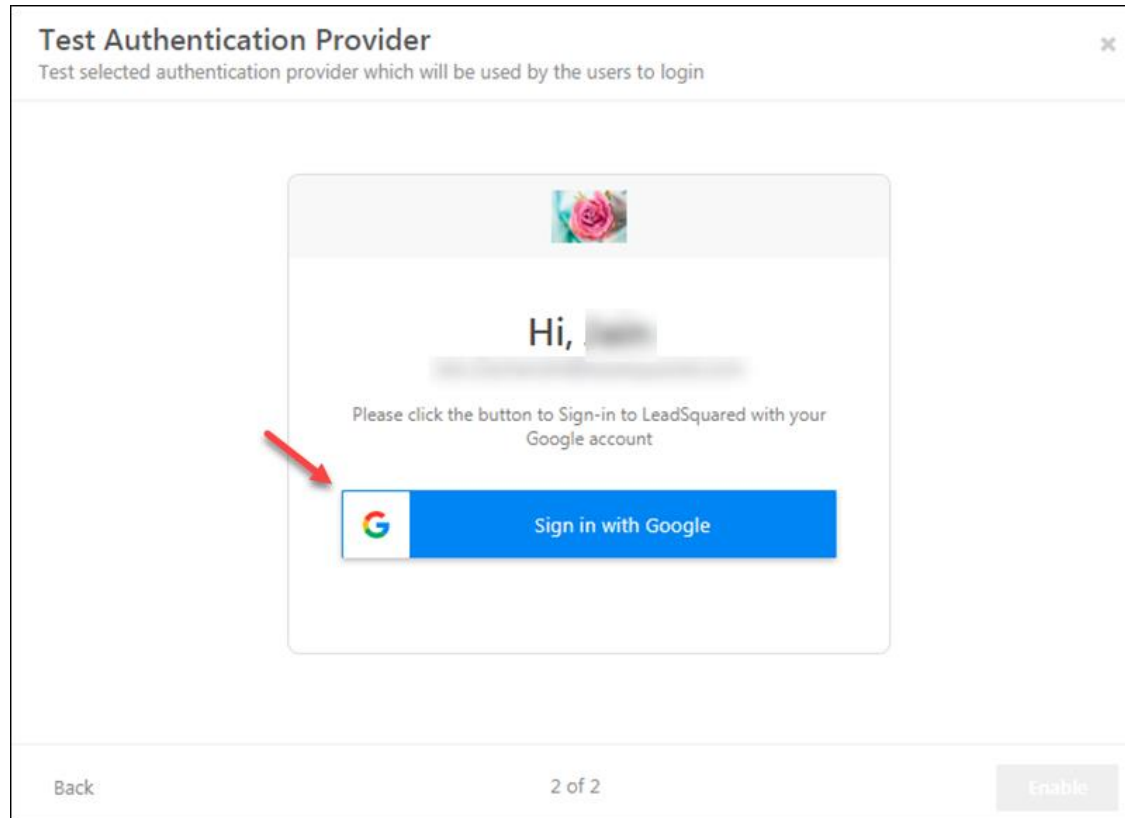

Authentication Provider - ADFS

- Prerequisites:
 - LeadSquared Administrator User
 - Access to your domain Active Directory server
 - ADFS Installed
 - SSL cert and thumbprint of that certificate
 - Username and email ID are the same on LeadSquared and on the platform you are trying to integrate
- Process:
 - Add a Relying Party Trust to your ADFS server
 - Obtain the Certificate Thumbprint
 - Configure LeadSquared Authentication Provider settings
- Detailed steps available here:
 - <https://help.leadSquared.com/adfs-integration-for-sign-in-in-leadSquared/>

Authentication Provider - ADFS

Authentication Provider - Google

Authentication Provider - API

- You can use a third-party tool to integrate auth with LeadSquared.
- Simple and easy to setup
- Process:
 - Enable *Third Party Auth Provider* > Select *API*
 - On the Configure Authentication Provider pop-up, enter the details of the API you've exposed. When you're done, click Test.

Permission Templates

- Permission templates let you control access to features and actions (like viewing, creating, editing, deleting, exporting and importing leads).
- Apply these templates on user, role or sales group level.
- You can:
 - Create a permission template
 - Apply a permission template
 - Control which users are shown in dropdown fields
 - Apply permission templates to Admin users

Permission Templates

Control users in dropdown fields

- 'User Access' setting lets you control the users shown in user/owner drop-down fields across the LeadSquared application.
- Helps you prevent sales users from accessing the leads of other sales users.
- Once you implement this feature, sales group managers will only see users in their own groups and other sales users in the group will only see their own names in all user/owner drop-downs across the platform
- This will help in restricting unwanted access between different teams or if you have external parties, between them and internal teams etc.

Permission Templates

(For Admin Users)

- Super Admins can setup Permission Templates for Administrator users

The screenshot displays the 'Settings' interface of LeadSquared. On the left, a sidebar menu includes 'Profile', 'Users and Permissions' (selected), 'Security', 'Accounts Customization', 'Customization', 'Opportunity Customization', 'Mobile App', 'Lead Tracking', 'Lead Prioritization', 'Email Settings', 'API and Webhooks', and 'Data Protection & Privacy'. The 'Users and Permissions' section is further divided into 'Users' (selected), 'Sales Groups', 'Roles', 'Teams', 'Permission Templates', 'Lead Assignment Quota', 'Restriction using IP Whitelisting', 'User Availability', 'User Check-in', 'Work Day Templates', and 'Holiday Calendar'.

The main content area is titled 'Users' with a subtitle 'Create and Update LeadSquared users'. It features a search bar, an 'Advanced Search' link, and filters for 'Type' (Regular Users), 'Role' (All), 'Status' (Active), and 'Team' (All). A 'Create' button and a menu icon are also present.

Below the filters is a table of users with columns: Name, Email Address, Role, Permission Templates, and Actions. The user 'Akshata' with email 'Akshata.US@lsqdev.in' and role 'Administrator' is highlighted. An actions menu is open for this user, showing options: Edit, Deactivate, Reset Password, Set Billing User, Set Permissions, Set as Super Admin (circled in red), Change Password, and Disable 2FA.

SECURE YOUR LANDING PAGES

Google reCAPTCHA

- Helps you protect from bot attacks and creating multiple fake leads
- You should have a valid Google Account
- Make sure you add all your landing page domains on LeadSquared here:

[Profile>Settings>LeadTracking>Website & Landing Page Domains](#)

- Process:
 - Generate reCAPTCHA key pair
 - Add key pair to your LeadSquared account
 - Link the keys to your landing page
 - Preview and finish the setup

Allow submissions from registered domains only

- Register the accepted domain here:

The screenshot shows the LeadSquared dashboard with the 'Settings' page open. The 'Lead Tracking' section is selected in the sidebar. The 'Website & Landing Page Domains' section is active, displaying a table of registered domains. A modal window 'Add Domain' is open, allowing users to add a new domain. A red arrow points from the 'Create' button in the table to the 'Add Domain' modal.

Personal Data Protection

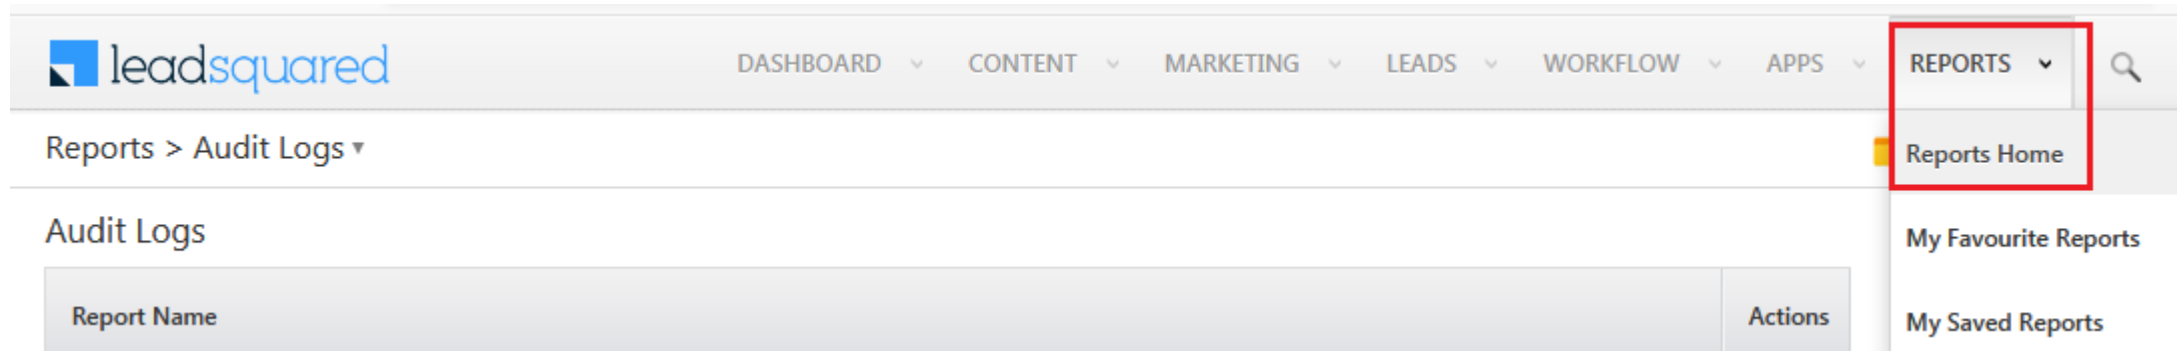

- This helps you comply with GDPR
- When enabled, it automatically creates a landing page in your account (in draft status) that you can publish to existing leads and present them with the following options –
 - View their data
 - Remove their data
 - Update their data
 - Do Not Track
 - Others (comments are available)

This is applicable to existing leads only and you can track if someone makes an entry here.

REVIEW AUDIT LOGS

Review Audit Logs

- All actions and activities on your LeadSquared account are recorded, and logs can be reviewed.
- On your *Administrator Dashboard*, click on *Reports > Reports Home*

The screenshot shows the LeadSquared Administrator Dashboard. The top navigation bar includes the LeadSquared logo and several menu items: DASHBOARD, CONTENT, MARKETING, LEADS, WORKFLOW, APPS, and REPORTS. The REPORTS menu is highlighted with a red box, and its dropdown menu is open, showing 'Reports Home' as the first option. Below the navigation bar, the breadcrumb trail reads 'Reports > Audit Logs'. The main content area is titled 'Audit Logs' and contains a table with two columns: 'Report Name' and 'Actions'.
