About us

At Amberjack we've long been setting the standards in future talent and intake-based volume recruitment. Our advanced systems and intelligent solutions are designed to deliver the ultimate recruitment experience. From intelligent attraction to recruitment process outsourcing and bespoke assessment and selection tools, we work as an extension to our client's teams. We are the quality behind the quantity. We do what's right for our clients and their candidates. We don't know any other way.

The role

We provide specialist software products to many of the UK's largest employers such as, Unilever, GSK, Mars, Network Rail, BP and PwC, and use proprietary cloud-based software tools to automate processes, manage application volumes and provide data driven insights to help assess and select candidates. We are a growing company and looking for Developers with a passion for technology to join our team. We offer the opportunity for you get involved in ground breaking and dynamic projects.

The main focus of this role is to develop customer facing applications, ensuring the best possible performance, quality and responsiveness of applications. You will be supporting our Consulting and Delivery teams to develop and maintain effective software applications, ensuring that we keep pace with constantly evolving technological advances and innovation. You will be creating, maintaining and improving systems, testing both hard and software systems to diagnose and resolve system faults

- Continually improving a suite of web-based solutions
- Creating integrations with 3rd party solutions and
- Creating bespoke functionalities and interfaces for clients
- Working on Greenfield projects to broaden Amberjack's product suite offering
- Contributing to and sharing 'Best Practice' within the technology environment
- Writing and testing code, refining and rewriting as necessary
- Maintaining systems by monitoring and correcting software defects

Who we're looking for

Someone with practical experience of working on projects and an understanding and demonstrable knowledge of a 'Best Practice' technology environment with the ability to communicate and effectively explain complex issues.

- C#, MS SQL Server
- ASP.NET MVC & Web API
- A minimum of 1 years' commercial experience
- Soap, WCF, Restful Web Services
- EF/ORM/MicroOrm
- IOC
- CI & TDD
- HTML5 & CSS3
- OO JavaScript, AJAX, JSON, etc.
- Typescript
- Enterprise level tiered architecture
- Azure/Aws

Why work for us?

In return we offer a competitive salary and benefits package, a collaborative, open and friendly working environment, and great opportunities for personal and professional development.
